

As a graduate of West Virginia University in Forest Management and having worked in the electric utility industry as a vegetation manager for 42 years, I have been a long term member and supporter of ISA and the Utility Arborist Association. I served as the Secretary/Treasurer for 25 years. I have also served on the boards and committees of several other not-for-profit and advisory organizations. I currently retired from Austin Energy as the vegetation manager of the municipal electric system for the city of Austin, Texas.
