

TREE Fund
Tree and Soil Research Fund

Tree Research and Education Endowment Fund (TREE Fund) is a nonprofit trust dedicated to empowering urban tree research on a global basis. In 2017, TREE Fund established the **Tree and Soil Research Fund (TSRF)**, specifically intended to support research questions directly related to the design, installation and management of trees in urban landscapes to support the work of Landscape Architects and our professional colleagues in related fields. TSRF's endowment goal is \$500,000. TREE Fund will begin awarding research grants of \$25,000 per year, in perpetuity, once this goal is met.

Landscape Architects and colleagues who value the benefits of healthy, mature trees in our cities are encouraged to support this endowment campaign.

Thank you for your support.

James Urban, FASLA
TREE Fund Trustee

TSRF is a permanently restricted endowment fund supporting areas of research of interest to the landscape architecture community with special focus in the area of trees and soils.

Supported research will include:

- the design and specification of trees and soils in urban landscapes;
- propagation and nursery practices that impact the establishment and long term growth of trees;
- improving species diversity;
- tree root and canopy structure improvement;
- soil and drainage design and modification;
- tree planting practices;
- tree planting space design;
- tree establishment and maintenance practices; and
- planting soil management and maintenance.
