Cultivating Innovation

## **Jonathan Cain**

Communications and Engagement Manager, TREE Fund

Jonathan joined TREE Fund in April of 2021 and has experience organizing endurance events since 2009. In addition to handling all the newsletter, communication, and social media details, his primary duties revolve around organizing the rider recruitment, communications, stops, and outreach events for the annual Tour des Trees ride. When he was younger, he was in charge of the “bikes” area at a cub scout camp, which involved taking the scouts on a ride to an area of the camp where they learned about the research that was being done on the sap collection of a group of trees, so organizing the Tour des Trees is a natural fit.

Jonathan graduated from Hope College in 2004 where he studied communication and political science and ran cross country and track. He currently lives just outside Chicago and spends a lot of time running along the various paths and forest preserves the area has to offer.
