AWARDEE DETAILS

"My academic goals and objectives are to gain the knowledge I need to be able to achieve my professional goals, graduate with a 4.0 GPA, and possibly go to graduate school. My professional goals are to work on finding solutions to environmental injustice, natural resource exploitation, and conservation and restoration."- Earielle London

"I am someone who cares deeply about the health of this world and all of its beings – a problem solver in mind and a caretaker at heart. I thrive on thoughtful analysis, efficient execution of plans, time in nature, and, appropriate to many occupations within the world of land management, a physical challenge. I believe that my additional career goals of employing scientific knowledge and study, working on a team, and bringing more representation for women into an industry dominated by men make me especially fit for a career in the arboriculture industry. I am elated to have found a program that enables me to pursue this powerful work and to connect with mentors and professionals who share my dreams of contributing to a more sustainable future."- Taylor Law
